

THE FINAL WORD ON:

LASER TONER RECYCLING

Should you be using recycled, remanufactured laser toner cartridges in your laser printers? Precious fossil fuels are exhausted in the manufacturing of the plastic cases that create mountains of waste materials after just one use. Even if you are not so environmentally conscious, everyone is conscious of the bottom line, and Recycled Toners Cartridges cost much less than new ones from Asia, while creating 42,000 American manufacturing jobs!

In the past, we have not recommended recycling because too many toner recyclers were more interested in profit control rather than quality control, and we have cleaned up too many laser toner disasters to generally support their use.

However, the economic and environmental incentives of recycling your toner cartridges are too compelling to ignore. We have researched and found a high quality local remanufacturer of laser toner cartridges. They disassemble empty cartridges to the minimal component and rebuild to exact manufacturer specifications. We have toured their environmentally conscientious plant, audited their quality control, interviewed their customers, and sampled their product. We will stand behind it and urge you to try it!

Our final word on recycled, remanufactured Laser Toner Cartridges is now **"YES"**.

As an additional customer benefit, many of you have been taking advantage of our OnSite Toner Co-op. Our increased purchasing power as a group of OnSite customers allows us to negotiate better prices for your toner and printer supplies. There is no membership fee or obligation of any kind, and satisfaction is guaranteed.

Our guarantee: When you purchase toner through our Co-op, OnSite protects you against defects, damage to your printer, and guarantees toner yield. We 100% guarantee your satisfaction! And be forewarned that if other recycled cartridges leak or damage your printer, you risk voiding manufacturer warranties, or incurring repair charges to your printer.

Save our earth, save money, and be assured of a high quality recycled toner product.
